OPTIONAL FEATURES

66 CM FLAT DISC

These discs with sharp notches cut the soil and turn it to loosen it. They are made of durable materials.

66 CM NOTCHED DISC

These discs with sharp notches cut the soil and turn it to loosen it. They are made of durable materials.

CURVED LEG PISTON

TRAFFIC KIT

The traffic kit in agricultural machinery is a tool used to regulate traffic within fields and prevent collisions between agricultural machinery and other vehicles while traveling on roads. These kits enable agricultural machinery to move in compliance with legal height, width and length limits.
